DAVIESWAY

"Farm Supply Since 1911"

DASCO

Cleaning the Country

INTRODUCTION

DAVIESWAY

The DAVIESWAY Company was founded by the present DAVIES family in 1911. Since this early beginning, the Company has developed into a major manufacturer and supplier of quality rural products for Australian farms.

Innovative design and development is a continuing priority of DAVIESWAY, and the Company is committed to supplying Australian farmers and rural industries with the best equipment and products. The Company is based in Melbourne, Australia, where the central warehouse operation serves rural areas throughout the country, supported by an office and warehouse location in Queensland.

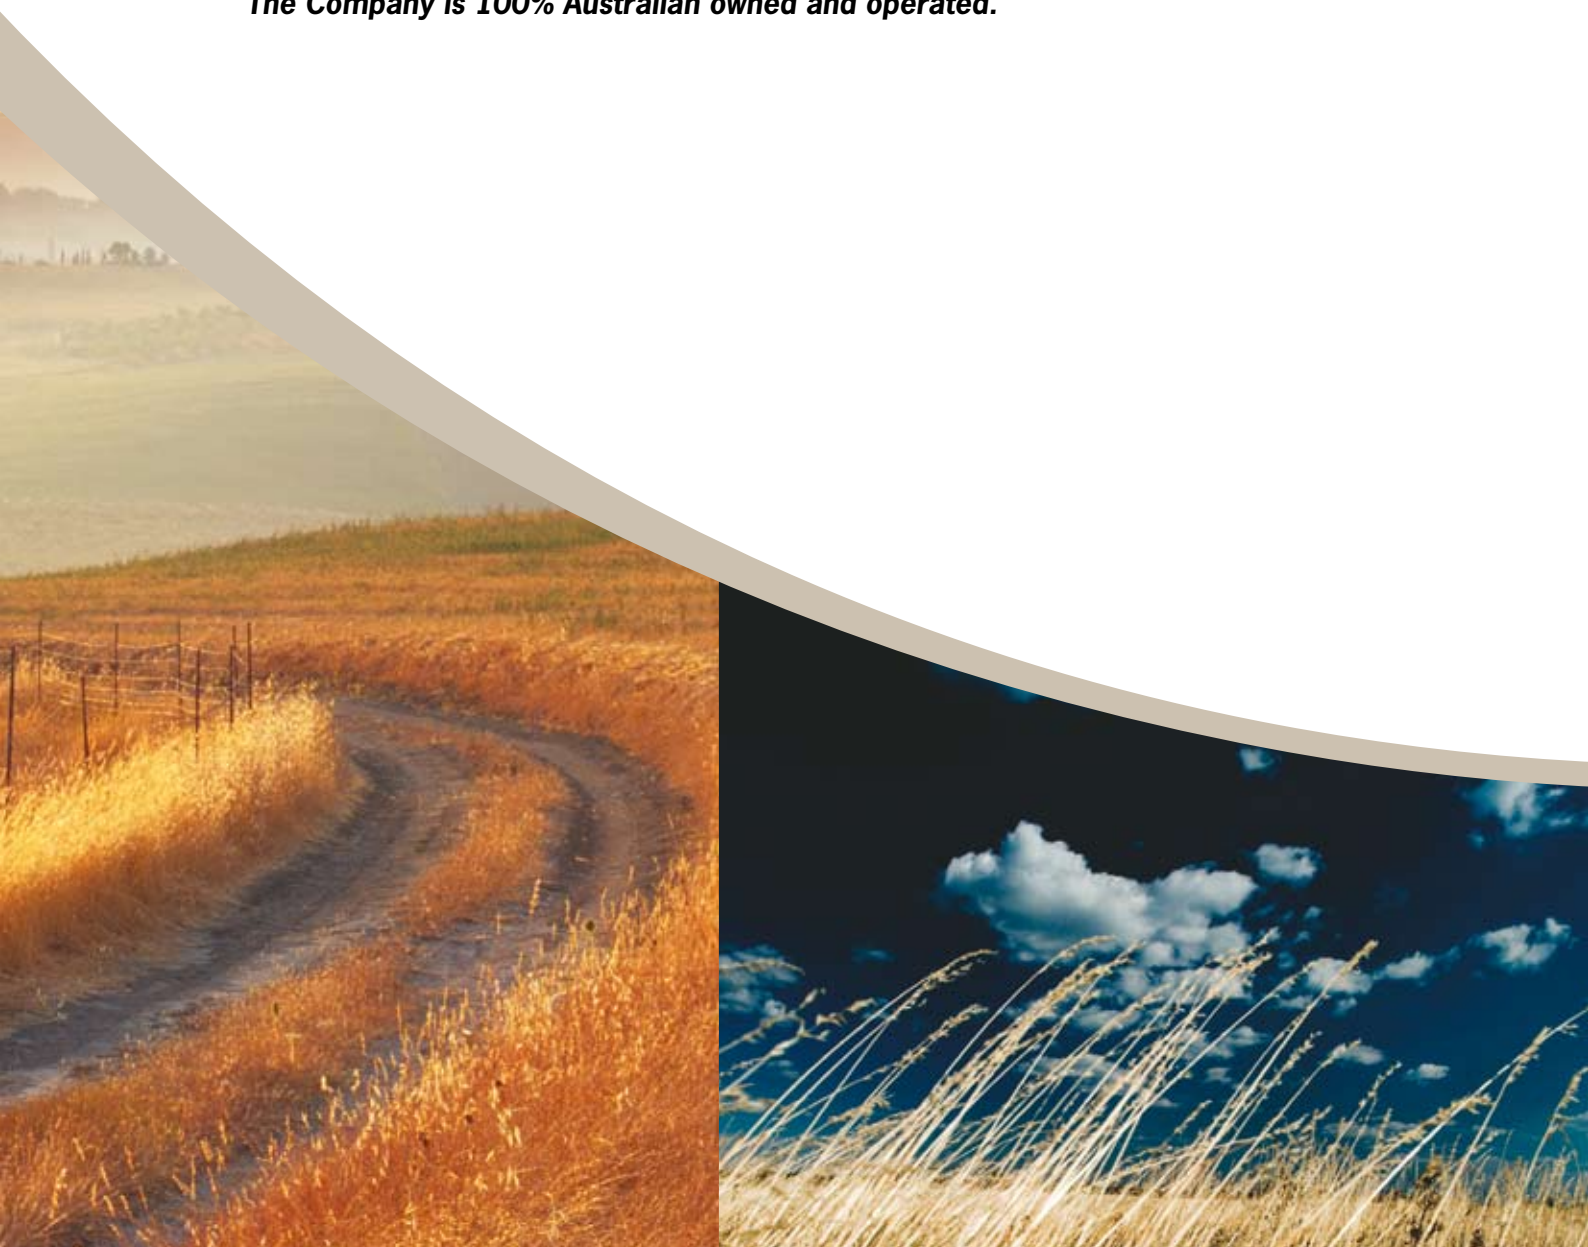

The Company is 100% Australian owned and operated and holds as paramount two proven principles, 'Value and Service'.

DASCO

DASCO is a sister company to DAVIESWAY. It is located adjacent to the Head Office and Warehouse of DAVIESWAY in Melbourne. DASCO was founded over 50 years ago and was the first Company in Australia to manufacture home and rural sanitisers for on-farm use.

The manufacturing operation is G.M.P. certified for veterinary preparations as well as farm hygiene products and food plant sanitisers. The production of consistently high quality hygiene chemicals is the sole focus of DASCO, and has led to an industry reputation that is well earned.

The Company is 100% Australian owned and operated.

Wet Weather Protection, Comfort and Visibility

Made from non-snag, heavy duty PVC with polyester rayon rot-resistant stockinet backing and additives to prevent degradation.

Farmtech Parka

- Non snag outer surface • Generous fit
- Ventilated back flap to reduce clamminess
- Storm cuffs maintain dry undergarments
- Two-way nylon, non-clog, non-corrosive zip
- Two large storm flap pockets • All seams stitched and welded for strength and weather-proofing • Sizes available: Small to 5XL

Farmtech Bib & Brace Overalls

- Non snag outer surface • Elasticated waist for comfort • Internal waterproof bib pocket
- Welded reinforced crotch • All seams stitched and welded for strength and weather proofing
- Sizes available: Small to 5XL

Farmtech Vest

- Non snag outer surface • Double slide zip
- Generous fit • Two side pockets
- Warm, lightweight washable polar lining
- Metal stud reinforcing on pockets
- Sizes available: Small to 5XL

Farmtech Pants

- Non snag outer surface • Generous fit
- Welded reinforced crotch • All seams stitched and welded for strength and weather-proofing
- Double side entry for ease of access to under trousers • Sizes available: Small to 5XL

Super tough, super light, polyurethane-coated Oxford weave nylon.

Duratech - All seams are double stitched and heat-tape sealed for extra strength and waterproofing.

Duratech Parka

- Extra-long length and lined for comfort
- Weatherproof storm cuffs • Velcro straps to adjust sleeves • Domed front flap
- Zip away drawstring hood • Two way nylon, non clog, non corrosive zip
- Generous fit • Sizes available: Small to 3XL

Duratech Bib & Brace Overalls

- Fully lined to reduce wind chill
- Elasticated back for working comfort
- Lightweight braces with snap buckles
- Internal bib pocket • Generous fit
- Sizes available: Small to 3XL

Duratech Vest

- Rain repelling sleeve caps • Two side pockets • Elasticised 'storm-stopper' sleeves
- Two way nylon, non clog, non corrosive zip • Generous fit
- Warm lightweight washable polar lining
- Sizes available: Small to 3XL

Duratech Pants

- Double side entry for ease of access to under trousers • Velcro straps to adjust legs • Lined for comfort • Generous fit
- Sizes available: Small to 3XL

Super lightweight, flexible, fully waterproof rainwear.

Dri-flex - Flexible rainwear that works with you for a new level of comfort.

Dri-flex Parka

- Hood with draw cord and barrel lock adjusters
- Double action front zip with storm flaps and non-rust domes
- Two storm pockets
- Storm proof cuffs
- Generous fit
- Sizes available: Small to 3XL

Dri-flex Bib & Brace Overalls

- Bib with large internal pocket
- Heavy duty webbing braces
- Heavy duty adjustable brace clips
- Soft elasticised back with back risers for comfort
- Dome adjusters at ankle
- Generous fit
- Sizes available: Small to 3XL

Dri-flex Vest

- Heavy duty double-action zip
- Two side pockets
- Warm lightweight washable polar lining
- Generous fit
- Sizes available: Small to 3XL

Dri-flex Pants

- Elasticised waist with drawcord
- Dome adjusters
- Double side entry for ease of access to under trousers
- Reinforced crotch
- Generous fit
- Sizes available: Small to 3XL

Wet Weather Wear Light and Tough

Tough, flexible, nylon backed PVC with seams stitched and welded for strength and water resistance.

Harvester - An economical Parka or Pants garment in a wide range of sizes.

Harvester Parka

- Hood with rain peak
- Adjustable opening on hood
- Velcro neck closure for comfort and water resistance
- Double action zip
- Domed storm flap
- Two pockets with storm-proof flaps
- Velcro adjusters on sleeve wrists
- Under arm vent holes
- Sizes available: Small to 5XL

Harvester Pants

- Generous fit
- Double side entry for ease of access to under trousers
- Elasticated waist with adjustable draw cord
- Velcro adjusters at ankle
- Sizes available: Small to 5XL

Daviesway Apron

- Built to last from tough PVC material
- Comfortable webbing neck and waist ties with adjustable quick release buckles
- Traditional strong brass eyelets
- Full length to protect clothing
- Waterproof and comfortable to wear

Sleeve Protectors

- Made from durable waterproof PVC backed nylon material
- Lightweight and comfortable to wear
- Protects your arms during milking
- Fitted with comfortable elastic cuff ends for added comfort

SKELLERUP

Farmboots for everyday use.
Cushion sole Gumboots built for lasting comfort

RED BAND

The original short farm boot. Proven over decades for being hard wearing and long lasting. Mid-calf length farm boot, with heavy duty cleated sole. Built-in rubber foam cushion innersole.

Sizing: 4-14

PERTH

The original tall farm boot. Like the Red Band, a proven performer. Built-in rubber foam cushion innersole. Heavy duty cleated sole.

Sizing: 4-14

DAIRY SHED

Designed to reduce the aches and pains from standing on concrete in the dairy shed. PU Footbed. Unique boat shoe squeegee sole provides maximum grip. Recommended for use only on concrete surfaces.

Sizing: 4-13

RED BAND - WOMEN'S

Mid-calf length farm boot, with heavy duty cleated sole. Built-in rubber foam cushion innersole.

Sizing: Women/Youth 3-9
Children 8-2

MARATHON 4X4

Knee length rubber boot with added protection and comfort. Ideal for farm bike users. Unique grip pattern mud release sole and built-in cushion sole. Specially designed with foot protection panels.

Sizing: 5-13

CLUTHA

Good quality, full knee length medium weight boot with plain toe. Suitable for farm or industrial use. Unique non-clog cleated sole with rear kick-off lug. Generous ankle dimensions for hands free on/off ease and now fitted with a built-in cushion sole.

Sizing: 3-13

FARM BOOT WITH CUSHION SOLE

The knee length gumboot for everyday farm use features cushion sole, breathable natural cotton canvas lining, generous leg fit, rear kick-off lug, heavy duty sole for great grip and is handmade from 100% natural rubber. Sizing: 4-13

CRACKERJACK

PVC youths and adults boots.
Youth Sizing: 10-2
Adult Sizing: 3-9

TERRANOVA

A general-purpose lightweight rubber boot for all the odd jobs around the farm. Knee length rubber boot. Ultra lightweight.

Sizing: Children 10-2
Women/Youth 3-9
Codes: FRT180 - FRT185
FRT186 - FRT192

EARTHTEC ORTHOTIC INNERSOLES

Anatomically designed 8mm polyurethane innersole with arch support for supreme comfort. Minimises foot and joint pain from prolonged standing on hard surfaces. Suitable for all types of footwear. Sizing: 4-13
Codes: FMI704 - FMI713

CHILDREN'S NOVELTY BOOTS

Novelty children's gumboots.
Sizing: 3c-13, 1-3
Codes: Builder FTH003 - FTH016
Tractor FTR003 - FTR016
Pony FTL003 - FTL016

BOOT SPIKES

To fit Skellerup Forestry boots. Sold in bags of 45 with key for easy removal and replacement.
Codes: FSC770 Stainless Steel
FSC774 Tungsten Carbide

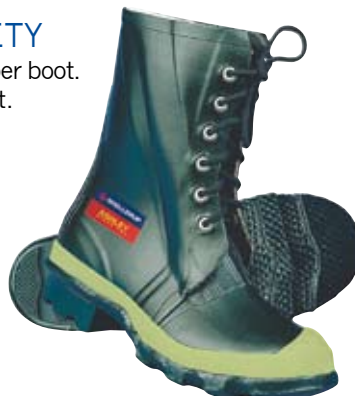

SKELLERUP

ASHLEY NON SAFETY

Mid calf length lace-up rubber boot.
Waterproof tongue gusset.
Calendered sole.
Sizing: 5-13

ASHLEY SAFETY

Mid calf length lace-up rubber boot.
Waterproof tongue gusset.
Moulded lug sole.
Sizing: 5-13

BULLER

Ankle height lace-up rubber boot.
Waterproof tongue gusset.
Calendered sole.
Sizing: 6-13

HIKER

Ankle height lace-up rubber boot.
Octopus suction grip sole.
Waterproof padded tongue.
Sizing: 4-12

SCHOEN 1100 Safety

Full grain leather, tall lace-up boot.
Suede leather bellows tongue.
D-ring lacing, thermoplastic heel counter.
Nitrile rubber sole and high abrasion protective toe cap.
Sizing: 6-13

SCHOEN 1100 Spiked Safety

All the benefits and performance of the Schoen 1100 plus the advantages of a flat moulded sole with replaceable spikes.
Sizing: 6-13

FORESTRY

Knee height rubber boot, with moulded rubber sole. Ballistic nylon shin guard and canvas lining. Reflective tape, nylon cuff and reinforced toe cap. Highest international chainsaw protection approval.
Sizing: 6-14

FORESTRY SPIKED

The features of the Forestry boot with a flat moulded sole and replaceable spikes for the ultimate in grip.
Sizing: 6-14

Work & Leisure Socks

Earthtec is the Skellerup range of high quality sockwear designed to perform in the great outdoors. Naturally, wool is the base fibre for the Earthtec range - a renewable resource and genuinely smart fibre. Soft to touch, resilient, warm when wet, dries quickly and breathes to keep your feet comfortable wherever they go. These natural qualities are complemented by sophisticated sock design and advanced knitting construction of only the highest quality fibres.

LEISURE

Aero Summer Sock

Strategically positioned nylon, plaited to the outside of the sock for durability and shape retention, open rib structure for moisture evaporation and enhanced breathability. Featuring comfort and foot support fitted with the ESS (Elastic Support System) gives you a personalised fit so your sock never falls down. Sizes: 6-10, 11-13.

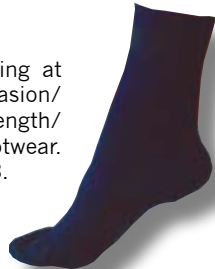

Merino Comfort

Premium comfort, warmth & durability. Smooth toe seams, low powered elastication in leg - prevents leg compression. Fine knit construction reduces bulk. Medium density padding in sole Comfort Zone for impact absorption. 80% wool 20% nylon. Sizes: 2-5, 6-10, 11-13.

Hiking

Smooth toe seams, high density padding at the heel/toe to help protect against abrasion/blisters. Blended with nylon for strength/durability. Complements heavyweight footwear. 80% wool 20% nylon. Sizes: 6-10, 11-13.

Superfleece

Elastic cuff, nylon toe. Pure Worsted Wool yarn for long lasting wear yet very soft to handle. All over Comfort Zone cushioning reduces the risk of abrasion/blisters. 80% wool 20% nylon. Sizes: 5-6, 7-8, 9-10, 11-13.

Gumboot Sock

The cushion knit comfort provides luxurious support. Elastic at ankle to prevent sock ride. Additional reinforced heel for long lasting wear and additional cushioning. Knitted with premium Merino Wool for insulation, warmth and moisture absorption, and Nylon fibre for durability. Sizes: 2-5, 6-10, 11-13.

Ultimate Boot Sock

The Ultimate Boot Sock, with the new ESS (Elastic Support System) technology which means a sock that always stays exactly where you need it. Unique, high stretch elasticated double cuff for easy fitting. Nylon reinforcing, loop pile cushioned heel and sole reduces shock and foot fatigue. Sizes: 6-10, 11-13.

WORK

Washdown Hose

The easy handling washdown hose. A heavy duty high pressure water hose designed for use as a dairy shed washdown hose and for irrigation applications such as parks, gardens, tennis courts, golf courses, sports grounds and general farm use.

- Skellerup Washdown Hose is made from virgin PVC which ensures long life
- Between the inner and outer sleeves of the hose a high tensile polyester yarn is bonded with heat and adhesive to maximise hose strength whilst maintaining flexibility
- External ribbing minimises abrasion on the external surface of the hose

The washdown hose is available in four sizes, 19mm ID, 25mm ID, 32mm ID and 38mm ID and can be purchased in coil lengths of 20m and 60m.

Masterblaster Nozzle

- A premium nozzle
- 32mm MasterBlaster (Yellow)
- 38mm MasterBlaster (Green)
- Made from hard wearing nylon
- Available to fit 32mm and 38mm hose
- The only nozzle which delivers up to 450L per minute
- Variable spray pattern

Power Jet Nozzle

- Made from tough polycarbonate polymer
- Power Jet Nozzles ideal for yard washing and any high volume/pressure applications
- Features a double 'O' ring to guarantee easy action
- Adjustable spray pattern from strong jet to fine fog
- Fits hose sizes 19mm, 25mm, 32mm and 38mm

Jet Spray Nozzles

- A range of hard wearing inexpensive nozzles made from nylon
- Each nozzle includes a rubber protector ring, stainless steel componentary and leak-proof hose adaptor
- Fits hose sizes 19mm, 25mm & 32mm

Stark Hose Swivel

Save yourself from the frustration of kinked hoses!

Stark Hose Swivel is a unique hose joiner that enables the hose to rotate 360°

Benefits:

- Stops kinks & knots
- Reduces stress & frustration
- Saves time
- Extends the life of the hose
- Sizes from 12mm to 50mm
- Rural, Industrial & Domestic use

Gilmour Gun

- High impact polymer body nozzle valve assembly and fixed nut
- Leakproof
- Adjustable spray pattern
- Ideal for farm and home use

Milksafe Milking Gloves

- Made from 100% Nitrile
- Puncture resistant
- Non allergenic / Latex free
- Saves your hands
- Cool, dry feel, no sweating
- Maintain milking hygiene standards
- Pack contains 100 gloves
- Sizes available Small, Medium, Large and X-Large

Love Gloves

These comfortable rubber gloves are ideal for washing up or odd jobs around the farm. Available in flocklined or sanitised rubber. Sizes available: Small, Medium and Large.

N-DEX Disposable Gloves

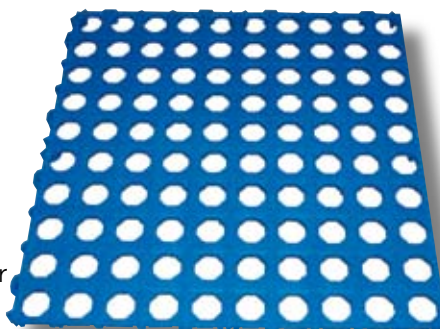

The most comfortable disposable glove available. These soft nitrile gloves resist a broad range of chemicals and provide better puncture and abrasion resistance than natural rubber and provide a better fit that conforms to your hand's shape. For comfort and coolness - non-tearing, feather light and super strong. Sizes available: Small, Medium, Large and X-Large.

COMFORT PLUS FLOOR MATTING

NON-SLIP - CUSHION - UNIVERSAL

- 500mm x 500mm x 25mm thick
- Open grid, textured surface
- Specifically designed for comfort and safety
- Minimises health hazards associated with standing on cold hard surfaces
- Mats are free draining and keeps the user dry even though the floor area may be wet
- Mats are robust in design and made from materials that have excellent insulating properties
- By using different pieces you can adjust the size and shape of the Mat for the area you wish to cover
- Interlocking to any size and shape mat
- Safety corners and edges available

This black heavy duty stock mat is ideal for cow turnaround areas of rotary dairies, sloping and slippery concrete, horse floats, workshop areas and farm vehicles etc.
Size 2000mm x 1000mm x 10mm

BUCKETS

STAINLESS STEEL TEST BUCKET

- Made from top quality stainless steel with high polish finish
- Sturdy handle for ease of carrying and pouring
- Available in 25, 30, 35 litre capacity
- 16 or 19mm entries
- Recessed or dome lids

MILK / CREAM CAN

POLY TEST BUCKET & MILK/CREAM CAN 30LT

- Made from high density polyethylene
- Robust design
- Multi size 16mm and 19mm entries
- Easy to clean
- Sturdy stainless steel handle for ease of carrying and pouring

FARM BUCKETS

- 6, 10 and 22 litre models available
- Made from heavy duty plastic
- Ideal all purpose farm and household bucket
- Heavy duty handle

VERSATILE MOBILE MILKER FOR COWS, SHEEP AND GOATS

- Units with one or two milking clusters
- Flo-Tek® stainless steel high capacity milking claw for fast milking, includes Stainless Steel Shells with Flo-Tek® Liners
- Galvanised steel mobile trolley
- Stainless Steel Vacuum tank and manifold
- Electric motor driven 220-240V, 50hZ, Single Phase
- Petrol Motor Models available
- Dry Carbon Vane Vacuum Pump - no oil
- Vacuum gauge and adjustable Vacuum Regulator
- Robust design
- Australian made
- Available with Stainless Steel or Heavy Duty Plastic Milking bucket

Single milking unit

Two milking unit

Sheep and Goat Models

Classic Cluster

- Available for sheep and goats
- Automatic valves on each liner only open when a teat is present in the liner
- Valves close automatically if the cluster is kicked off
- All sheep & goat liners are silicone

Vanguard Cluster

- See through claw to monitor milk flow
- Excellent vacuum stability at the teat end
- Simple to operate, user friendly
- Cleans in place
- Highly resistant to impact damage
- All spare parts available

WHY ALL CALVES LOVE PEACH TEATS

Peach Teats
Two colours available:
Pink or Black

Lamb, Kid & Fawn Teats Available

Why do more farmers choose Peach Teats?

Peach Teat simulates natural feeding because milk is squirted into the calf's mouth, just like a real milk let down. It's fast too, because the world patented flap valve inside forces milk out the end of the teat instead of back into the feeder. And the transverse slits on the end of the teat are positioned to minimise milk loss when the teat is not in use.

Peach Teat with a Twist - another world first! Now Peach Teats are available as the world's first screw in teat, which makes cleaning and replacement as easy as a couple of twists. Screw in Peach Teats are dual purpose and can still be pulled through on standard calf feeders.

PEACH POWER CALF REARING PRODUCTS

COMPARTMENT

6 Station - Straight

Volume: 24 litres
Compartments: 3 litres
Mounting: Galvanised brackets suitable for wooden rails & gates

- Natural rubber feeding teats
- Fits standard bottles

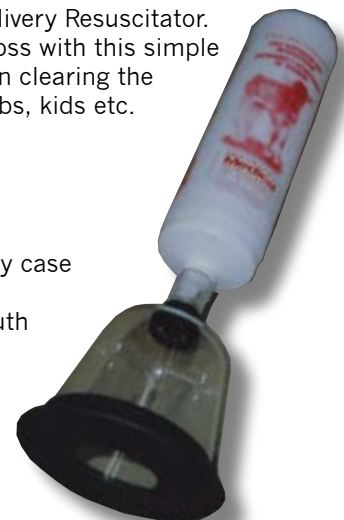

NEWBORN RESUSCITATOR & ASPIRATOR THE BREATH OF LIFE

Reduce the risk and loss of valuable newborns with the McCulloch Constant Delivery Resuscitator. Farmers can now reduce stock loss with this simple to use resuscitator that assists in clearing the airways of new born calves, lambs, kids etc.

Resuscitator features:

- Two section body pump
- Aspirator and mask
- Resuscitator mask
- Comes complete in sturdy carry case
- Simple to use
- Fits firmly over the nose & mouth
- Removes mucus from airways
- Forces air into the lungs

H & L CALF FEEDING SOLUTIONS

Innovative animal friendly technology which modern calf rearing requires.

**NEW FOR 2008
H & L IGLOO
TRANSPORTABLE
CALF SHELTERS**

FEATURES OF THE H & L 100:

- Powdered Milk only or Powdered/Whole Milk system
- Automatic flushing and regular cleaning program
- One base unit can operate up to 4 feed stations
- Two mixing bowls - enables two rations to be independently mixed and fed for individual calves
- Adjustable mixing, drinking and washing temperature
- Flexible feeding program to suit all stages of a calves growth
- Security valve - so calves can only drink their programmed ration
- Station pump situated in each feed stall - to ensure feed is immediately available
- Powder storage - 50kg hopper standard
- Additive Dispensers - Powder and Liquid - Optional
- Suitable for Queen of Calves feeding

Simple Programming

- Clearly arranged 4 line display
- Easy, self explaining, question/answer style program menu
- Automatic transponder or NLIS identification
- Clearly arranged alarm lists
- PC and printer connection standard

NUTRI CALF SUPREME AUTO CALF FEEDER

An automatic calf feeder that is designed to individually feed up to 150 calves from 1 base unit and four feed stations.

The H&L Milktaxi Fast, easy mixing and transportation of CMR or WHOLEMILK.

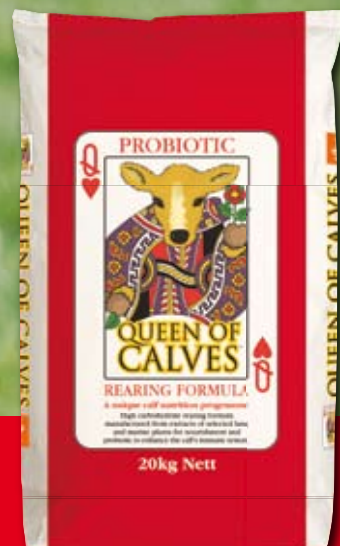

Dairy and calf husbandry farmers often wonder whether calves should be fed manually, with an automated feeder, or in yet another way. The H&L Milktaxi is the result of our search for the optimum solution for feeding calves effectively with a teat feeder bucket. The H&L Milktaxi is a stainless steel tank mounted on wheels that allows mixing and dosing of the calves' diet. With its combined mixing and dosing system and its four sturdy tyres, which mean total mobility, the H&L Milk Taxi has the tremendous flexibility that makes it useful for any kind of dairy operation.

The H&L Milktaxi at a glance

- Capacity 80 litres, 120 litres, or 250 litres
- Effective and fast ration mixing
- Heats ration to correct feeding temperature
- Easy milk transport from milk room to calf pen
- Rapid milk dosage into the teat feeder buckets with a dispensing tap
- Optional Integrated Pasteuriser

Everybody's talking about Queen of Calves

Queen of Calves is made from selected land and marine plant extracts to nourish the immune system, plus specialist amino acids, osmoregulatory compounds and multi-vitamins. Beginning at about Day 19, QoC is mixed with milk and fed until weaning.

Released in Australia in February 2005, Queen of Calves has stormed the market delivering outstanding results. To secure your requirements for the coming season or for further information and a copy of our DVD, contact Dasco on 1-800 155 369

Queen of Calves is available at leading rural suppliers throughout Australia

PRONTO FOR CALVES

Oral electrolyte re-hydration therapy for scouring calves.

- Supplies energy & restores lost electrolytes & fluids in scouring calves
- Provides calves with a higher level of acidity in their stomachs to help eliminate germs such as e-coli & salmonella
- Helps to seal the wall of the gut which stops the diarrhoea & prevents any further loss of fluids & electrolytes
- Vitamin "C" boosted which builds up the immune system to respond to infections
- When mixed with water is orange in colour for easy identification

Pronto available in 1.75, 4, 8 & 16kg pails

"Get Your Calves up and going Pronto"

X-Factor, a probiotic for calves, designed for the first 18 days

X-Factor is a new probiotic from the makers of Queen of Calves, specifically designed to enhance calf health in the first few days. Independent research has shown the use of probiotic can improve the absorption of vitamins and cellulose. Most importantly it can assist in preventing the growth of bacteria that cause diarrhoea and scours from multiplying.

Be pro-active by treating your juvenile calves with nature's own powerhouse defence force, beneficial bacterium contained in X-Factor

X-Factor probiotic for calves is available at leading rural suppliers throughout Australia. For further information, please contact Dasco on 1800 155 369

Colour coded cleaning solutions for industry, farm and home

- Supreme durability and quality
- Designed to withstand heat and chemical applications
- Colour coded for cleaning zone applications
- Comprehensive range
- Ergonomic design

Available in 6 colours: white, black, blue, green, red and yellow.

SAFETY MEASURE PUMPS

- INNOVATION • SAFETY • RELIABILITY • CHEMICAL RESISTANCE

The unique Dasco Safety Measure Pumps;

- eliminates wastage
- safely dispenses chemicals
- accurately measures chemicals
- easy pour 1 litre bottle included
- swivel spout to avoid spillage
- pumps acids, alkalis & herbicides
- high volume, low pressure & easy flow
- models available to suit 110/200 lt & 20/25 lt drums

Contact your Dasco distributor for full details on this truly unique product.

FLY CONTROL ON A ROLL

Simple, safe & effective

- Non-toxic, environmentally sound • Contains no insecticides or pheromones
- Easy to install: readily disposable • Suitable for organic farming
- "Captured 92% of available flies." USDA Tests

Knocks out the Fly Population

Flies land on Sticky Roll and become entrapped only to attract more flies. Soon the breeding population is virtually eliminated.

Non-Toxic, Environmentally Sound

Sticky Roll is a specially designed glue tape on a roll. That's it. No added insecticides or attractants are required. It is environmentally friendly, non-allergenic and won't irritate if touched. The used reel is thrown away, flies and all.

Constant Cost Effective Fly Control

A dramatic alternative to spraying and fogging. Sticky Roll gives effective 24-hour fly reduction, without the constant work and mess. Safe, effective, non-toxic Sticky Roll has an unlimited range of uses in any covered area where flies are a problem, including stables, dairy barns, swine and poultry enclosures, and animal premises of all kinds. Sticky Roll is also recommended for use in zoos, kennels, refuse areas, bakeries, canneries and factories.

Sticky Roll mounted with Deluxe Hardware Kit. When roll is full, empty roll becomes new take up reel. Complete instructions are included.

DASCO

Cleaning the Country

Ezy - Powerful Hand Cleaner

- Premium quality water based hand cleaner
- Ideal for removal of dirt, grease and grime
- Contains Polymer Beads for deep cleansing

The milking machine is the most important part of a dairy farming business.

Pasture and feed management, cow health, infrastructure and lifestyle make a successful dairy farming business but the major income source of a dairy farm is milk collected by your milk company every day or two.

Premium milk is paramount to maximising farm business income.

A quality, efficient easy to operate and clean milking system will ensure fast and clean milking of cows, cow comfort, cow health and maximising milk production, securing premium milk and premium income.

- From Manufacturing

- To Installing

- To your choice of Milking System

- To your choice of Milking System

- To your choice of Milking System

- *To your choice of Bailing Systems and Rotary Platforms*

Sequential bails End Exit and stallwork system with or without feeding

Sequential bails Rapid Exit and stallwork system with or without feeding

Rotary Platforms from 30 to 100 (or more) bails designed to suit your needs

- *Plus to complete your milking machine complex*

Cluster removers to suit every dairy

Feed systems automatic or manual

Milk diversion systems to suit every dairy

Drafting systems automatic or manual with I D systems

No matter how small or large your dairy upgrade, alteration or new development you may be planning in your dairy farm business plan contact

Daviesway on 1800 MOO COW (1800 666 269) for good advice, planning, competitive pricing and down to earth service.

We have a dealer network Australia wide for local service, supported by our technical support team.

FLO-TEK LINERS

LONG LIFE GENTLE MILKING INFLATIONS

FLO-TEK. *Liners are manufactured by Skellerup Industries, one of the largest manufacturers of liners in the world.*

- Long life and gentle milking
- Designed for high production
- Anti-twist marks for correct assembly
- Models to suit 11mm & 13mm claws
- A design to suit every cow
- Improved formula for efficient milking

Ensure your cows teats receive the best possible care by using correctly matched **FLO-TEK** liners to your shells. It is essential that liners match the claw, shell, and teats of the cows. Make sure all liner measurements match the shell and claw before installing your new liners.

Liner And Claw Table

"C" in claw milk nipple size means the liner has a shut off point in the tail to aid cluster attachment"

TECH-LINE MILKING LINERS

Ensure your cows teats receive the best possible care by using correctly matched TECH-LINE liners to your shells. It is essential that liners match the claw, shell, and the teats of the cows.

The **TECH-LINE** range of liners suit a variety of shells and claws. Make sure all liner measurements match the shell and claw before installing your new liners.

Liner And Claw Table

TECH-LINE · A.L.	17	155	11	145	24	23.6

TECH-LINE STAINLESS STEEL SHELLS ARE AVAILABLE.

IMPORTANT INFORMATION:

Liners should be replaced every 2,500 cow milkings. Planned replacement ensures liners will always be providing clean efficient milking, and enabling the best possible level of teat care. The older the liner, the more likely they are to harbor bacteria. Use only approved cleaning materials and procedures as per the manufacturers instructions.

SKELLERUP

BLUE LINE DAIRY TUBING

Blue Line dairy tubing is made from premium natural based rubber to ensure maximum flexibility and range of movement. In addition all Blue Line tubing has ultra violet protection built into the rubber formulation to prevent excessive surface cracking from Australia's harsh weather conditions.

Skellerup Milking Machine Tubing is manufactured and supplied to the Dairy Industry worldwide.

Blue Line Milk, Air and Twin Tube

- Milk Tube 12.7mm ID "one blue line"
Designed to fit over a 16mm tube
- Milk Tube 14mm ID "two blue lines"
Designed to fit over a 16mm or 19mm tube
- Milk Tube 16mm ID "three blue lines"
Designed to fit over a 19mm tube
- Air Tube 9.5mm ID
Designed to fit over a 12.7mm tube
- Twin Air Tube 7.0mm ID
Designed to fit over a 10mm tube
- Claw Tubes 8 different sizes available

All Blue Line Milk, Air and Twin Tube are available in 1220mm, 18m and 30m lengths/coils.

REFLEX TUBING

Developed to deliver superior performance

Reflex Premium Silicone Tubing

Reflex Premium Silicone Tubing is constructed using a silicone formulation specifically designed for Australia's dairy industry. Available in 20m coils, the range includes standard single air, twin air, 14mm ID and 16mm ID milk tubing.

Reflex Moulded Reinforced Claw Tubes

Reflex Moulded Reinforced Claw Tubes are the preferred choice for most farmers for their robust construction, yet are still supple and easy to fit because of their unique rubber formulation. By virtue of its design, the solid rubber bumper section can withstand greater knocks and does not collect dirt, making it easier to clean. The Reflex Moulded Reinforced Claw Tubes are available in one size - 190mm.

FLO-TEK®

FLO-TEK CLEAR PVC TUBING

Crystal-clear Milk Tubing allows for immediate visual inspection. Its smooth, non-porous inner surface prevents particle buildup from butterfat, milkstones, and milk-soil, while reducing the potential for bacterial growth within the milk and air line.

BLUE LINE MILK FILTERS

Deliver higher quality milk

Manufactured from the revolutionary fabric, Mono-Poly, a unique non-woven fabric especially designed for use in milk filtration. Mono-Poly is needle punched and thermo bonded, offering great advantages over other filter fabrics - including better filtration and greater burst strength, giving you quality milk. Available in a wide range of sizes in socks, sleeves and 200m rolls.

The Bonding

- Sanitary and has food approval
- Manufactured to Food and Drug Administration (FDA) requirements. (Standard sewing threads do not comply to this standard)
- Stronger than sewing
- Due to the absence of sewing perforations partial leakage of sediments does not occur

Advantages of Mono-Poly

- Mono-Poly filter fabric is 100% Polyester and contains no added chemicals or binders
- Excellent burst strength and dimensional stability
- Resists chemical breakdown
- Leaching of fibres reduced to a minimum due to strength of fibre bonds in the fabric
- Fibre to area ratio is higher giving excellent sediment retention

HIGH VOLUME MILKING CLAWS

OUTSTANDING FEATURES:

- Automatic shut-off
- High capacity
- 11mm, 13mm or 14mm milk inlet nipples
- Welded milk entries and solid stainless body
- Claw bowls available to suit all claw types
- 360° clear visibility impact resistant bowl
- Large impact buffer
- High flow 19mm milk exit tube
- Same FLO-TEK claw body will fit onto both MK1 and MK2 bowls
- Available in 2x2 or 4x1 pulsation
- As an option claws can be fitted with the revolutionary 'TOUCHDOWN' for fast, effortless and comfortable cluster removal

FLO-TEK CLAW BOWLS

OUTSTANDING FEATURES:

- Claw bowls available to suit most claw types
- Models S, U and W available
- 360° clear visibility bowl
- Large impact buffer
- High flow 19mm milk exit tube
- Impact resistant bowl
- Two claw bowl volumes: 280 and 330ml
- Easy to clean

VARIFLO JETTERS - IPC LINE WASHING

NO.1 NOZZLE

- Conical Shape to suit 21mm-23mm diameter mouthpiece liners
- Variable Flow Non Return Valve to ensure all clusters wash correctly
- Mounting Options
 - Fixed Overhead
 - Fixed Low-Line (Requires Milking Cluster Support)
 - Hose-Mount (Requires Milking Cluster Support)

NO.2 NOZZLE

- Suits 24mm to 25mm Diameter mouthpiece liners
- Variable Flow Non Return Valve to ensure all clusters wash correctly
- Mounting Options
 - Fixed Overhead
 - Fixed Low-Line (Requires Milking Cluster Support)
 - Hose-Mount (Requires Milking Cluster Support)

NO.3 NOZZLE

- Suits 21mm to 23mm Diameter mouthpiece liners
- Variable Flow Non Return Valve to ensure all clusters wash correctly
- Mounting Options
 - Fixed Low-Line (Requires Milking Cluster Support)

NO.4 RUBBER CUP

- 3 Sizes Available to match the head size of liners – 35mm, 40mm, 45mm
- Variable Flow Non Return Valve to ensure all clusters wash correctly
- Also Washes the Head of the liner
- Mounting Options
 - Fixed Overhead
 - Fixed Low-Line (Requires Milking Cluster Support)

NO.5 NOZZLE

- Suits all liner sizes
- Variable Flow Non Return Valve to ensure all clusters wash correctly
- Designed for quick cluster installing and removing
- Mounting Options
 - Fixed Low-Line (Requires Milking Cluster Support)

NO.6 CLIP-IN

- Suits all liner sizes, the clip in Nozzle holds each shell while washing
- Variable Flow Non Return Valve to ensure all clusters wash correctly
- Mounting Options
 - Fixed Low-Line (Does not require Milking Cluster Support)
 - Hose-Mount (Requires Milking Cluster Support)

FLO-TEK JETTERS

FLO-TEK JETTERS

- One piece moulded jetter body
- Simple flow adjustment to ensure all clusters wash correctly
- Optional Clip on cover
- 6 different nozzle Sizes Available
- Clip-in model has nozzles aligned for easy cluster installation and removal

- Mounting Options
 - Fixed Low-Line
 - 51mm OD Stainless Steel
 - Hose-Mount (Requires milking Clust Support)

ATS 5000 AUTO TEAT SPRAY SYSTEM

The ATS 5000 AUTO TEAT SPRAY SYSTEM:

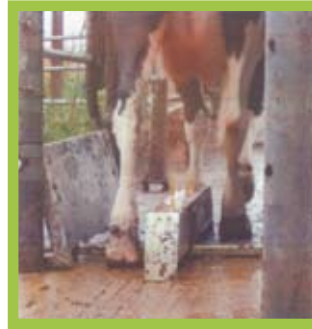

- Utilises a compressed air operated pump to draw solution direct from the storage container
- Optional second set of output nozzles for bloat oil or fly control
- Different nozzles for varying application rates
- Designed in conjunction with the Milk Harvesting Research Centre at Ellinbank, Victoria
- Can be retro-fitted into most existing exit race facilities
- Program menu accessed through touch pads on the control panel
- Programmable timers for on time and delay time for main nozzles
- An Australian Made product

A typical installation with the floor unit and side skirts in place. The control module is mounted on the right hand side, with the second part of the sensor on the left hand side of the race.

Teat sprayer in operation showing how the cross bar makes the cow step, exposing the udder.

Teat sprayer in operation showing the twin fan sprays.

Auto teat spray control module, showing 'ready' to spray. The display will also show:
Blocked - if a sensor is blocked or out of alignment
Armed and Arming - as a loading sequence
Spraying - when the solenoids are open
Tank low alarm - this is available when the Liquid Level and Alarm option is installed

AMBIC.

AMBIC: A Healthy Herd • A Healthy Profit

Jetstream ... the best teat spray system in the world

JETSTREAM AUTOMATED TEAT SPRAYING SYSTEM

The Jetstream Automated Teat Spraying System is designed to be operated by the dairy shed's vacuum system. The spray unit consists of a variable output diaphragm pump connected to multiple spray guns to administer the teat treatment onto the cow's udder. Installation is simple and takes approximately 2 hours.

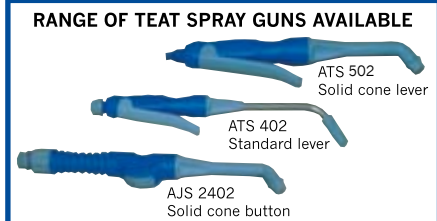

TECHNICAL FEATURES:

The Ambic Jetstream has a high capacity diaphragm pump to ensure that pressure can be maintained when up to 5 guns are in operation and the pressure relief module ensures that the pump cuts in only when required to maintain the correct operating pressure. This means that the pressure remains at the correct level for optimum performance regardless of the vacuum setting or the number of guns operating at the same time.

MASTITIS DETECTION & PREVENTION

AMBIC VISION MASTITIS DETECTORS... *The world's simplest and best in line detector.*

Vision In line mastitis detectors which are simply a clear plastic inspection vessel with a very fine mesh gauze, traps mastitis clots to enable easy detection and subsequent isolation of the infected cow. The In line detectors are available for standard and larger bore milk tube.

Features:

- 100% Mastitis detection during milking
- Does not restrict milk flow or vacuum levels during normal milking
- Simple to install - takes only minutes
- Superior visual spot check pinpoints the affected cow immediately
- No messy and time consuming fore-milking
- Reduces risk of cross infection from stripping by hand
- Fits milk lines up to 19mm bore
- Large bypass ensures milk flow even when screen blocked
- Manufactured using materials all with FDA approval
- Comprehensive Twelve Month Warranty

OTHER PRODUCTS AVAILABLE: DIP CUPS, MILK SAMPLERS, STRIP CUPS

CHLOR-KLENZ

A low foam heavy duty chlorinated alkaline detergent with built-in chlorine sanitiser. Specially formulated for removal of fat and protein deposits. Synergistic blend of sodium hydroxide and sodium hypochlorite. Latest surfactant system to control water scale and mineral hardness.

REV-WASH

A lo-foam heavy duty liquid alkaline detergent ideally suited for automatic washing systems or reverse flow plants. It can be used with the hardest of water without changing the amounts used.

KLENZ-IN-ONE

A combined low foam detergent and sanitiser for one step cleaning and disinfection of stainless steel milk contact surfaces. Hot water is not required and is effective in cold water to 40c and is ideal for use in waters with high mineral content where alkali detergents cause a reaction.

ALKA-KLENZ

A high quality general purpose alkaline detergent suited for the removal of fat and protein deposits. It has an economical dose rate of 15gms per 10lts and is available in medium, low or non-foaming.

SUPA-KLENZ

A lo-foam heavy duty chlorinated (sanitiser) circulation cleaner which has a caustic powder base. It can be either used daily or monthly as part of a total cleaning procedure. It can also be used as part of a heavy duty bomb treatment.

ALKA-RINSE

A non-ionic after milking cold water rinse additive which assists in the removal of milk residues prior to the acid and alkaline hot washes. It is very economical and ideal for large bore milklines and reverse flow plants. Low foam or medium foam formulations available.

TANK KLENZ

A specially formulated liquid alkaline based detergent for the cleaning of milk vats. It has been designed to be used in the temperature range 15-720C, thus saving hot water and possible damage to the vat. It contains a safe but powerful bacteriostat that disinfects and gives a thorough clean. Low foam or medium foam formulations available.

REDENE READY-TO-USE

Australia's first Ready-To-Use teat dip and spray. Guaranteed 0.5% iodine at teat end as recommended by Countdown Downunder to give consistent performance of your mastitis control program. No mixing or dilution is required, which eliminates wastage and saves time. Redene Ready-To-Use is pH balanced with elevated free iodine levels and contains a total complexed emollient system with 10% glycerol for optimum teat condition.

REDENE

The original Redene teat spray started teat disinfection in the 1960's and is now available with glycerine. Consists of 2% available iodine which provides fast kill of mastitis bacteria and a broad spectrum of germ kill. Each 20 litre drum provides up to 200 litres of available solution.

GLY-COTE

Udder emollient is a gentle blend of glycerine, sorbitol and skin conditioning agents for addition to iodine teat dip preparations in cold windy weather. Balanced formulation of humectants to retain moisture and keep teats soft and supple.

ACID-FLO

Acid-Flo is a low foaming liquid acid detergent for milkstone control and removal. It acts as a water descaler and is phosphate free. Designed for removal of mineral soils, it is ideal for use in hard water conditions. Recommended for use in cleaning dairy farm milking plants, vats and CIP systems.

ACID-KLENZ

A lo-foam liquid phosphoric acid detergent for milkstone removal which can be used at a low dose rate. Especially suited to automatic washing units or reverse flow plants where liquids are a must. It is easily dissolved and quick to dispense. Contains sanitiser.

CITRA-KLENZ

A lo-foam, sulphamic acid powder detergent ideally suited for the removal of milkstone. It dissolves readily and is pink in colour to distinguish it from alkali detergents. It is made to cope with all water conditions in Australia with a dose rate of 15gms per 10lts.

MULTI-TEMP

Combined acid dairy detergents and sanitiser. Powerful blend of 3 acids and a sanitiser. Designed to control milkstone and kill thermophilic bacteria. Non residual formulation means no rinsing. Plant may be left to drain. Ideal for one step cleaning and sanitation of stainless steel milk contact surfaces.

ULTRA-ACID

A lo-foam liquid acid detergent for milk stone control and removal. Designed for use in all water conditions, especially dam, bore and channel waters. Helps prevent organic and colloidal separation in poor water quality areas. Strongest acid dairy detergent in Australia.

ELIMINATE

A cold water sanitiser and acid detergent which is equally biocidal in waters of all degrees of hardness. Eliminate contains no iodine, chlorine or quaternary compounds (QUATS). It is suitable for re-use in acid sanitising systems and works in both hot and cold water.

IOPHOS

An iodine based sanitiser with phosphoric acid for the sanitising of all milking machines and bulk tanks. It is available in both medium and lo-foam which assists those farmers with 3rd line cleaning. Used in cold water, it is economical, easy to mix and gives maximum protection against bacteria.

PROTECT - E

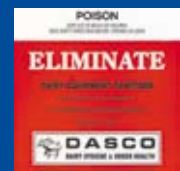

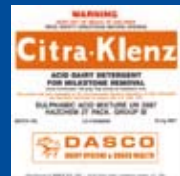

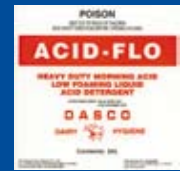

A highly effective chlorhexidine gluconate teat spray or dip sanitiser that helps control mastitis and other disease conditions of the udder and teat skin. Protect "E" contains a high level of complex emollients so that only water needs to be added. It's ready to use emollient system saves time and money whilst maintaining superior udder health.

PROTECT

A powerful chlorhexidine gluconate teat sanitiser. Contains no iodine and provides fast effective kill of mastitis causing organisms. No with-holding period. Protect is suitable for spraying or dipping.

UDDAGARD

Contains 1% iodine destroying mastitis causing bacteria. Including glycerine to keep the teat soft and provides a skin which retains the iodine. Used as spray or dip it is mixed with equal parts of clean water to avoid detailed mixing instructions for milking staff.
